

SkyLOCK™

On DAR (Data at Rest) BPA# FA8771-07-A-0306

NextGen Technology Services is a software development and distribution company specializing in next generation encryption software solutions for any highly secure global settings. **SkyLOCK™** Encryption-At-Rest technology is an ideal security solution to reduce or eliminate risks associated with data breaches by securing data-at-rest for servers, laptops, thumb drives, workstations, computers, and PDAs. **SkyLOCK™** is **NIST FIPS 140-2 Level 2 certified**. Without **SkyLOCK™** Encryption-At-Rest you risk:

- Lost or theft of computing devices exposing data
- Careless or malicious users revealing unprotected proprietary data
- High turnover contractors or employees exposing data
- Unintended redistribution or leaks of mission-critical information

SkyLOCK™ key differentiators include:

- **SkyLOCK™** is independent from Microsoft and other operating systems (Active Directory, LDAP) so if the operating system is compromised, security is not impacted.
- Data is handled within the gigabytes available. **SkyLOCK™** does not require large temporary storage to encrypt/decrypt.
- **SkyLOCK™** encrypts/decrypts data on removable media.
- Very fast, non-cyclic encryption. **SkyLOCK™** can rapidly encrypt/decrypt multiple files and directories.
- **SkyLOCK™** can create a recoverable back up with tracking and log for audit and compliance.
- Drop and drag or right click features make **SkyLOCK™** easy to use.
- Multiple “wrappers” of encryption for extra security specific to each computer without significant overhead.
- Manufactured in the United States and complies with “Buy America.”

SkyLOCK™ is available for purchase directly from NextGen or through:

DAR BPA# FA8771-07-A-0306 (GSA SmartBuy-federal and state governments can purchase from DAR BPA) via HI Tech Services, Inc. a Service-Disabled Veteran-Owned Small Business (SDVOSB) and receive the benefit of SkyLOCK™ and meet your agency SDVOSB goals!
